## Table S3

Combination Through Time

All Treatments Through Time

The correlation coefficient (Spearman's rho) of treatment (caffeine, estradiol and combination) with time for each Aurelia aurita polyn response variable (ruffling elongation

budding and total number), as determined by the corresponding Spearman's Rank-Order Correlation test.						
	Response Variable					
	Ruffling	Elongation	Budding	Total		
Control Through Time	0.745	0.745	0.917	0.960		
Caffeine Through Time	0.823	0.823	0.926	0.954		

Correlation test.
